FOREWARD

The University Grants Commission (UGC), Nepal is currently undertaking the Higher Education Project, which is a national priority project for facilitating the implementation of the higher policy framework of Nepal. The national higher education policy framework emphasizes on systematic development of higher education in the country. For the success of the policy implementation, it is imperative that the system is capable of reliable Education Management Information System (EMIS). One of the important aspects of the EMIS is to publish it in the form of a report annually.

The Education Management Information System (EMIS) report the fiscal year 2082/083 B.S. (2025/26 A.D.), published by Kanakai Multiple Campus compiles and shares key statistical data on higher education in the campus.

This report is the second edition in this line. The national higher education policy framework lists major thrusts of ensuring access to higher education on the basis of aptitude and equity, criteria-based quality assurance, priority-based relevance, research-based innovation and development, and performance-based funding. This report covers major parts of the H-EMIS indicators and their analysis.

Kanakai Multiple Campus has developed EMIS with the help of H-EMIS developed by UGC. The main strategy is to develop a web-based compatible EMIS system. The campus is developing web based EMIS. There are many challenges in developing comprehensive EMIS in the campus because the software purchased by the campus is yet to deliver its output because it is in the phase of data entry.

The EMIS Report lists the information related to the academic programs, students, faculty members, research, publications, and financing. The data are disaggregated by important variables and analyzed to provide important issues based on the indicators derived from various sources. It is expected to benefit the researchers and its stakeholders. The campus appreciates constructive feedback and suggestions for further improvement of the report in the future.

SECTION 4: GENDER PARITY INDEX (GPI)

Gender Parity Index (GPI) tells us about the access of girls students to higher education. It is one of the most important indicators which are used to measure the participation of girls' in higher education. GPI in higher education is expressed as the ratio of the number of girls to the number of boys enrolled in higher education. A value of near one indicates equality, less than 1 displays in favor of boys, and value larger than 1 means disparity in favor of girls.

In 2025/2026, the GPI in Kanakai Multiple Campus is **1.73**, which means there is disparity in favor of girls compared to boy's enrollment.
